Example - Erosion & Sediment Control Plan

This is an example Erosion and Sediment Control Plan produced from a CAD program, detailing what is required to be submitted as part of Development Applications for sites less than 0.3 hectare.

The example plans details the following mandatory erosion and sediment controls:

- Water flow path
- Sediment control barriers
- Stabilised access point
- Cut/wash area

It also shows other standard features of a plan including contours, perimeters fences, undisturbed areas and stockpile area.
